ClinicalMatch,Inc

Clinicaltrial.gov developer information

Present information from clinicaltrials.gov in an easy to use and patient friendly similar to the design of the clinicalmatch site. New development will target Patients/volunteers. The following general information is required:

- Only USA listed studies
- Only Recruiting studies

How it will work

**A. Patients/Volunteers**

When a Patient/Volunteer searches for a clinical trial on [www.clinicalmatch.com](http://www.clinicalmatch.com), and doesn't find what they are looking for, they can search for it on a custom page made for [www.clinicaltrials.gov](http://www.clinicaltrials.gov) on our website. After the patient searches, they will apply and wait for ClinicalMatch to contact the research site notifying them of a potential patient/volunteer that is interested in the clinical trial. The research site will need to register on Clinicalmatch, so that they can view patient/volunteer information if they are a good match. From here the sequence will follow the current Clinicalmatch sequence of events- Clinicalmatch will match the patient/volunteer with the research site.

Information needed from clinicaltrial.gov for Patients/Volunteers

- B. Title of study
- C. Identifier number or NCT number
- D. Study description- Brief summary
- E. Eligibility criteria
- F. City and State of where clinical trial is taking place
